

# 1860 Series: Control Valve - Stem Packing Sets

## 1860 SERIES

Configured for commonly used control valves, these molded PTFE sets consist of (3) "V"-rings, (1) "M"-ring, (1) "F"-ring and a wiper ring. For lower operating pressure the thinner "legs" of this higher profile design allows for sealing with less compression of the packing set. Our V-Ring packings are suitable for most applications. Component parts are available separately for custom configurations.
